TECH RECYCLING SERVICE from MyPC2Repair®

*Want to make the world cleaner
and greener? Do what we do.*

**Recycle your old
Technology Stuff.**

1. TECH RECYCLING: YOU CAN DO IT.

Our Tech Recycling Service costs just \$10, \$15 or \$20 per item, including shipping, handling, and recycling.

IMPORTANT NOTICE REGARDING YOUR RESPONSIBILITIES:

MyPC2Repair® will recycle the electronic products you provide to us. The recycling uses a mechanical process that crushes all items into raw materials. All data will be lost during the recycling process. MyPC2Repair® does not have any responsibility for, and specifically disclaims against, any damage or any claims whatsoever which may arise from any lost data, confidential data, removable media or software on the items you bring in for recycling.

2. Tech Recycling with Acceptable Items.

| ACCEPTABLE | ACCEPTABLE | <u>NOT</u> <u>ACCEPTABLE</u> | <u>NOT</u> <u>ACCEPTABLE</u> |
|--|---|---|---|
| <ul style="list-style-type: none"> 4Monitors (CRTs) 4Monitors (LCD) 4Fax Machines 4Desktop PCs 4Laptop PCs 4Printers/All-In-Ones 4Scanners 4Peripherals: e.g. Keyboards, mice, drives, etc | <ul style="list-style-type: none"> 4Telephones 4Digital Cameras 4Video Cameras 4VCRs 4DVD Players 4MP3 Players 4Small Televisions 4Cords & Cables | <ul style="list-style-type: none"> X Cracked monitors X Electronics covered in liquids / leaking X Refrigerators or other like/similar items X Appliances, all/any kitchen such as Toasters, microwaves, etc. X Items containing radioactive materials | <ul style="list-style-type: none"> X Items that have, or may have been contaminated with chemicals X Liquids, of any kind |

*Cell phones, PDAs, rechargeable batteries, ink and toner cartridges are recycled separately.

BEFORE YOU PROVIDE YOUR ITEMS TO MyPC2Repair® FOR RECYCLING, YOU ARE RESPONSIBLE FOR:

- Ensuring all items are acceptable (see list above)
- Backing up any data you may require in the future
- Deleting confidential data that may be on the items.
- Removing any removable media, such as diskettes, CDs, or PC Cards
- Removing any ink and toner cartridges. (These are recycled separately.)

3. Give your Tech Recycling items to any MyPC2Repair® technician or associate.

A technician or Associate will inspect your items to make ensure all items are acceptable. If everything meets our guidelines, you will be asked to complete a form and the item will be accepted and shipped for recycling.

PLEASE KEEP IN MIND:

If the item can't be accepted or any items are found unacceptable, you will be asked to remove the excess or inappropriate items before any other items are accepted for shipment. Items cannot be shipped directly from a customer location for recycling.

Frequently Asked Questions

Q. Why does MyPC2Repair® charge for the Tech Recycling Service?

A. MyPC2Repair® charges a nominal fee of \$10, \$15 or \$20 for this service to cover the costs of the box, shipment and recycling. For other recycling options, please call your local waste management authority to find electronics-recycling options in your area.

Q. Isn't it a waste to use a new box to recycle old technology?

A. We must use well-designed and sturdy boxes to ensure safe shipping. Finally, we use 100% post-consumer recycled cardboard and **recycle all boxes again** after they have been used.

Q. How will my items be recycled?

A. All items will be crushed and raw materials extracted using a shredding process. All recycling will occur in the U.S.A.

Q. Is there any risk of identity theft if I recycle products with confidential data?

A. MyPC2Repair® does not take any liability for your personal or confidential data and recommends you clean all data before recycling. However the crushing that occurs in the shredding process would make it almost impossible to recover any data.

Q. What materials come out of the process?

A. This depends on what items are put in, but the most common materials recovered are glass, plastic, copper and aluminum.

Q. What other recycling services does MyPC2Repair® offer?

A. We also provide free recycling for cell phones, rechargeable batteries and ink & toner cartridges. For more information, please contact us..

Each year, Americans throw away millions of tons of old or broken electronics, creating potentially harmful waste known as tech trash. This doesn't have to happen. By using our Tech Stuff Recycling Service, you can help turn tech trash into useful raw materials.

Today's tech trash is
tomorrow's resources

Types of materials generated through our Tech Recycling process
